Question: 58

Your customer asked what other value the Identity Engines portfolio can add to the existing access control solution. What are your two responses? (Select two)

- A. Identity Engines interact with RSVP servers to assign bandwidth when required**
- B. Identity Engines deliver a baseline level of confidence that the network is protected and secure against inappropriate access and activity**
- C. Identity Engines uses a proprietary economic in-band protocol to communicate with authenticators**
- D. Identity Engines provide operational cost reduction through dynamic assignment of VLAN's, filters and bandwidth policies**

Answer: A,D

Question: 59

You are following up on a customer who has recently installed an Avaya Wireless LAN 9100 solution that now wants to allow users to bring their own Wi-Fi devices onto the network. What upsell opportunities would you be focusing on during your visit?

- A. The upsell opportunity here is for Access Control with the Avaya Identity Engines portfolio that provides centralized, policy-based network access control.**
- B. The upsell opportunity here is for knowledgeable and experienced Avaya consultants that can help to deploy a cost-effective BYOD enterprise-grade wireless network. The result is better resiliency and performance and improved support for key applications.**

Answer: A

Question: 60

Which unique Wireless LAN 9100 feature enables the delivery of predictable application performance to mobile users?

- A. Bonjour Optimization**
- B. Application Control**
- C. Software upgrade to 802.11ac**
- D. MIMO, Multiple-Input and Multiple-Output**

Answer: B

Question: 61

There are 4 Global Support Services portfolios that are available to the Customer; Direct, Retail, Wholesale, and Co-Delivery. Which of these portfolios is sold only by Avaya and not by Partners?

- A. Direct (GX5300)**

- B. Wholesale (Express) GX6300
- C. Co-Delivery (PASS) GX4300
- D. Retail (US Only) GX6100

Answer: B

Question: 62

Your prospect is using VMware to virtualize their Data Center. In a meeting one of the customer representatives asks if Avaya offers a tool to manage and visualize a Data Center Network including automatic configuration of VMs and the physical infrastructure. How would you respond?

- A. Yes, there is the Element Manager, which allows customer to manage VMware O elements. This tool is particular interesting for IT Manager that like to see Virtual Machines while they are being moved.
- B. Yes, the tool is called Visualization Provisioning Service. It synchronizes the provisioning on the network infrastructure to match changes in the VM environment.
- C. Yes, there is the IP Flow Manager, which provides some of these functions.

Answer: B

Question: 63

The offering of VSP 4000 dramatically strengthens our position in delivering a simple, resilient and scalable solution through support for IP Multicast over Fabric Connect. Which three of the following features are enabled by Multicast over Fabric Connect? (Select three)

- A. Scale-out to tens of thousands of streams
- B. Designed for single tenant environment
- C. Recovery sub-seconds
- D. Single protocol (IS-IS)

Answer: A,C,D

Refernece:

Smaller enterprises looking for cost effective virtualization technology to help reduce network complexity, increase agility and improve network uptime

Distributed enterprises where there is a desire to extend Avaya VENA Fabric Connect over Service Provider WAN connections or Metro Area Rings to reach remote offices

Secure traffic separation for multi-tenant environments (different departments, companies) or for regulatory compliance (PCI DCC)

IP video surveillance networks to provide efficient and scalable Unicast / Multicast support as well as provide power for IP Surveillance cameras

Question: 64

One of Avaya's customers has contacted you and requested a recommendation for a product that will be able to act as a captive portal and will provide the ability to authenticate and offer access to users that do not have 802.1x capability. Which of the following products would you recommend?

- A. Identity Engines Ignition Server with Ignition Access Portal**
- B. Identity Engines Ignition Basic only**
- C. VPN Gateway 3050**
- D. Identity Engines Ignition Server only**
- E. Identity Engines Ignition Posture only**

Answer: A

Question: 65

Which two of the following would best describe the VSP 4000? (Select two)

Introducing the VSP 4000

- A. VSP 4000 extends the reach of Avaya Fabric Connect to the campus edge, WAN edge or metro edge**
- B. VSP 4000 is ideally suited for the Data Center ToR**
- C. VSP 4000 runs the robust core software from VSP 9000 on ERS 4800 hardware**
- D. VSP 4000 is ideally positioned in a large campus core**

Answer: A,C
