handling style.

Answer: C

approved answer.

Question: 80

You have administered a network connection to a remote messaging server. You leave the Avaya Aura Messaging system ports at their default settings and administer the remote. LDAP port on the network machine as 55000. When you test the network connection, updates between the Avaya Aura Messaging system and the networked machine fail.

What is the likely reason for the failure?

- A. The Aura Messaging Firewall Service is not configured to allow traffic on port 55000.**
- B. The networked machine's IP address has not been added to the external hosts file.**
- C. Maximum Simultaneous LDAP Directory Update Sessions is still administered as zero.**
- D. The default port for network update traffic is 56389, not 55000.**

Answer: A

proved answer.

Question: 81
