Administering System Center Configuration Manager

...

QUESTION: 51

DRAG DROP

You need to configure the membership rule for Collection3. The solution must meet the Configuration Manager requirements. What should you run? To answer, drag the appropriate values to the correct locations. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

values

- ResourceId
- SMS_G_System_SYSTEM
- SMS_R_SYSTEM
- SMSUniqueIdentifier
- SystemRole

Answer Area

```
Add-CMDev:deCollectionQueryMembershipRule - CollectionName "Collection3"  
-QueryExpression "select SMS_R_SYSTEM.ResourceID,  
SMS_R_SYSTEM.ResourceType,SMS_R_SYSTEM.Name,  
SMS_R_SYSTEM.SMSUniqueIdentifier,  
SMS_R_SYSTEM.ResourceDomainORWorkgroup,  
SMS_R_SYSTEM.Client from SMS_R_SYSTEM  
inner join SMS_R_SYSTEM on Value Value  
= SMS_R_SYSTEM.ResourceId  
where SMS_G_System_SYSTEM Value = 'Server'"  
-RuleName "Rule1"
```

Answer:

Exhibit

Values

- ResourceId
- SMS_G_System_SYSTEM
- SMS_R_SYSTEM
- SMSUniqueIdentifier
- SystemRole

Answer Area

```
Add-CMDev:deCollectionQueryMembershipRule - CollectionName "Collection3"  
-QueryExpression "select SMS_R_SYSTEM.ResourceID,  
SMS_R_SYSTEM.ResourceType,SMS_R_SYSTEM.Name,  
SMS_R_SYSTEM.SMSUniqueIdentifier,  
SMS_R_SYSTEM.ResourceDomainORWorkgroup,  
SMS_R_SYSTEM.Client from SMS_R_SYSTEM  
inner join SMS_R_SYSTEM on SMS_G_System_SYSTEM ResourceId  
= SMS_R_SYSTEM.ResourceId  
where SMS_G_System_SYSTEM SystemRole = 'Server'"  
-RuleName "Rule1"
```

Explanation:

QUESTION: 52

You need to implement the Asset Intelligence reports to meet the technical requirement of Customer1. What should you do?

- A. On all client computers, enable success auditing for logon events.
- B. On the primary site server, create a custom client settings object.
- C. On all client computers, enable success auditing for account logon events.
- D. On the primary site server, modify the SMS_def.mof file.

Answer: A

Explanation:

QUESTION: 53

Which server must host the WSUS database for the additional software update point of Customer2?

- A. Server2
- B. Server4
- C. Server5
- D. Server11

Answer: C

Explanation:

<https://technet.microsoft.com/en-us/library/gg712312.aspx> Overview

Relecloud is a pharmaceutical company located in Montreal. The company has marketing, research, and development departments.

Existing Environment

Intranet and Internet Infrastructure

The network contains a single Active Directory forest named relecloud.com. All servers run Windows Server 2012 R2. The network infrastructure contains the following:

? A Microsoft System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) primary site that has a site code of CO1

? A Remote Desktop Services (RDS) Session Virtualization deployment

? Microsoft System Center Updates Publisher 2011

? <!--[endif]--> The Network Device Enrollment Service (NDES)

? <!--[endif]--> An enterprise certification authority (CA)

? <!--[endif]--> A Microsoft Intune subscription

The network contains the client computers configured as shown in the following table.

Department	Operating system	Computer type
Marketing	Windows 7 Enterprise	Laptop
Research	Windows 10 Enterprise	Tablet
Development	Windows 8.1 Enterprise	Desktop

All of the computers are managed by using the Configuration Manager client.

Configuration Manager Enrollment Configuration Manager has the following configurations:

? Configuration Manager has only two custom collections named Collection1 and Collection2. The collections contain the client computers. Collection1 includes Collection2.

? Updates Publisher 2011 and Configuration Manager are integrated. All third-party updates are deployed by using Updates Publisher 2011.

? Configuration Manager generates reports that contain the console users of all the client computers.

? Configuration Manager is set as the mobile device management authority.

? The scheduled synchronization of software updates is disabled.

? A certificate registration point is installed. Application Environment

An application named App2 is published from the RDS session deployment. App2 is configured to have the .app2 file type association in the RDS deployment.

An application named App3 is deployed by using Configuration Manager. App3 is configured to have an installation dependency on an application named App4. All of the users in the development department use an application named App6. All of the executables for App6 are stored in a folder named C:\App6.

Current Problems

The users in the marketing department leave the office for up to two weeks at a time on business-related trips. The users' computers are reported to have a status of inactive in Configuration Manager.

The development department users report that they fail to connect to their computer from their personal Android device

by using the Microsoft Intune company portal.

Planned Changes

Relecloud plans to implement the following changes:

- ? Deploy an RDS Virtual Desktop Infrastructure (VDI) that contains Windows 8.1 Enterprise x64 virtual machines.

- ? Install an application named App1.exe locally on the planned RDS VDI. Application Virtualization Requirements

Relecloud identifies the following application virtualization requirements:

- ? The Microsoft Application Virtualization (App-V) client requires an unattended installation.

- ? Plug-ins for App1.exe must be installed by using the App-V 5.0 Service Pack 3 (SP3) client.

- ? Users must be able to launch App2 by double-clicking files that have the .app2 extension.

- ? The App-V packages must be published to each user, not globally.

- ? The disk space used by the App-V packages must be minimized.

- ? App1.exe must be able to interact with App-V-based plug-ins. Configuration Manager Requirements

Relecloud identifies the following requirements for Configuration Manager:

- ? The status of each client must be summarized daily.

- ? App4 must be replaced by an application named App5.

- ? App4 and App5 cannot co-exist on the same computer.

- ? The usage of the App6 executables must be monitored.

- ? Any software configured to auto-start on the client computers must be reported.

- ? The laptops of the marketing department users must not be reported as inactive.

- ? Updates from a new third-party vendor named Vendor1 must be deployed. Vendor1 provides updates in the form of .cab files.

- ? The maintenance window for the computers in Collection1 and Collection2 must be scheduled from Friday at 20:00 to Monday at 04:00.

- ? A device collection named Collection3 must be created. Collection3 must include all of the Configuration Manager clients that run Windows Server. The membership of Collection3 must be updated every five minutes.

Intune Requirements

Relecloud identifies the following requirements for Intune:

- ? Internal CA certificates must be deployed to the mobile devices of the development department users by using the Intune company portal.

? The development department users must be able to access their desktop from their personal device by using the Intune company portal.

QUESTION: 54

You need to configure Asset Intelligence. The solution must meet the Configuration Manager requirements. What should you do?

- A. From the Assets and Compliance workspace in the Configuration Manager Console, edit the inventory classes.
- B. From the Administration workspace in the Configuration Manager Console, enable the Check Application Title with Inventory Information Asset Intelligence maintenance task.
- C. From the Administration workspace in the Configuration Manager Console, enable the Summarize Installed Software Data Asset Intelligence maintenance task.
- D. On the client computers, enable the auditing of successful logon events.

Answer: A

Explanation:

https://docs.microsoft.com/en-us/scm/core/clients/manage/asset-intelligence/configuring-asset-intelligence#BKMK_EnableSuccessLogonEvents

QUESTION: 55

HOTSPOT

You need to configure the .app2 file association for all of the users. The solution must meet the application virtualization requirements. What should you do for each department? To answer, select the appropriate options in the answer area.

Answer Area

Marketing:

▼
Deploy a script that uses a bootstrap.wcx file.
Create a default connection URL by using Group Policy.
Create a Work Resources connection by using Control Panel.

Development:

▼
Create a default connection URL by using Group Policy.
Create a Work Resources connection by using Control Panel.
Copy the .rdp file for App2 to the %appdata%\Microsoft\Workspaces subfolder.

Research:

▼
Create a default connection URL by using Group Policy.
Create a Work Resources connection by using Control Panel.
Copy the .rdp file for App2 to the %appdata%\Microsoft\Workspaces subfolder.

Answer:

Exhibit

QUESTION: 57

You need to recommend a solution to provide remote connectivity for the development department users. The solution must meet the Intune requirements. What should you

include in the recommendation?

- A. Set Intune as the mobile device management authority.
- B. Create a script to add the users to the Remote PC Connect group on the desktop computers.
- C. From the Configuration Manager Console, modify the primary device property of the users.
- D. From the Configuration Manager Console, deploy the Intune connector site system role.

Answer: D
