Planning and Designing HP Enterprise Solutions

D. HP ActiveAnswers Integrity Sizer Tool

Answer: B

QUESTION: 111

You need to verify the supported connectivity between a server platform and the HP StorageWorks EVA8000. You also need to determine if additional software or tools are needed to implement the solution. Which resource provides this information?

- A. HP Enterprise Configurator
- B. HP SAN Design Reference Guide
- C. HP SalesBuilder for Windows
- D. HP StorageWorks Administrator Guide

Answer: B

QUESTION: 112

Which HP software product can help an administrator simplify tasks related to applications and infrastructure?

- A. HP Support Tool Manager (STM)
- B. HP MC/Serviceguard
- C. HP OpenView Operations (OVO)
- D. HP OpenView Storage Data Protector (DP)

Answer: C

QUESTION: 113

You designed an Enterprise Virtual Array 6000 storage consolidation solution with a NAS-SAN Fusion integration based on an HP EFS Clustered Gateway. Data protection will be done using a SAN-based HP EML 103e Tape Library and HP OpenView Data Protector. Why is it important to do a proof-of-concept to show the customer that the designed solution will perform, is scalable and is assured of a good future?

- A. to prove NAS-SAN interoperability

- B. to demonstrate investment protection
- C. to demonstrate iSCSI functionality needed for backup
- D. to verify chances for winning with the designed DAS infrastructure

Answer: B

QUESTION: 114

After completing the proof-of-concept stage for a proposed solution, your customer has concerns. What are the next steps to finalize and secure the deal?

- A. Create an alternative design and present it to the customer for consideration.
- B. Re-design the solution if needed and ask the customer for outstanding issues.
- C. Recommend that the customer place the order immediately and schedule a day for implementation.
- D. Arrange a second proof-of-concept to verify the results given by the first proof-of-concept.

Answer: B

QUESTION: 115

Your customer has several applications running on an HP ProLiant server with a Microsoft Windows operating system. Which HP tool should you recommend to prevent memory leaking?

- A. HP Systems Insight Manager
- B. Performance Management Pack
- C. Workload Management Pack
- D. System Performance Monitor

Answer: C

QUESTION: 116

Which ProLiant Essentials Value Pack identifies bottlenecks on an MSA1500 with Microsoft Windows operating systems?

- A. Performance Management Pack (PMP)
- B. Workload Management Pack (WMP)

- C. Rapid Deployment Pack (RDP)
- D. iLO Advanced Pack

Answer: A

QUESTION: 117

You want to assess whether your customer's IT operation requires a high-availability solution. What information is relevant for making this assessment?

- A. user workload
- B. criticality of applications
- C. amount of storage
- D. type of network

Answer: B

QUESTION: 118

When considering system performance, which questions should be asked? Select THREE.

- A. What amount of storage is needed?
- B. How are the applications accessed?
- C. Is the intended use processor intensive?
- D. Which high-availability features are needed?
- E. How many simultaneous users are anticipated?

Answer: B, C, E

QUESTION: 119

Your customer is using an old version of SCO UNIX on HP servers that are no longer sold. You learn that they are almost out of capacity. What should you do? Select TWO.

- A. Do nothing, provided the customer is still receiving support.
- B. Immediately start to transition the customer to Alpha/PA-RISC servers.
- C. Discuss with the customer the benefits and ease of upgrading.
- D. Determine the customer's current and future needs.

Answer: C, D

QUESTION: 120

In which phase of the presales cycle is it appropriate to offer to do a proof-of-concept for the customer?

- A. identify the opportunity
- B. develop and propose the solution
- C. implement the solution
- D. negotiate and close

Answer: B
