*Managing Windows and Linux Server Systems*

**Answer:** A

**QUESTION:** 106

Your company has a working Windows Server 2008 R2 Active Directory domain. All users in your company log in to this Active Directory domain. Some users need to connect to the domain remotely. They have done this through the network VPN service and have often experienced dropped connections when using the VPN. You want these users to be able to log in to their Windows desktops securely from a remote location without requiring a VPN connection. What do you need to install or configure to make this possible?

- A. the Remote Desktop Web Access role
- B. the Terminal Services Connection Broker role
- C. the Terminal Services Cryptography feature
- D. the Remote Desktop Gateway role

**Answer:** D

**QUESTION:** 107

You have a new Windows Server 2008 R2 server. A dozen remote users will log in to this server. You need to enable the server to be accessed through a remote desktop connection. What must you install or configure on this server to allow this?

- A. the Terminal Server role
- B. the Remote Assistance feature
- C. the Remote Desktop Services role
- D. permit the RDP protocol in Windows firewall

**Answer:** C

**QUESTION:** 108

Which remote access protocol allows graphical applications to be executed on a Linux server but displayed securely on a remote desktop?

- A. X11

- B. SSL
- C. HTTPS
- D. RDP

**Answer:** A

**QUESTION:** 109

What is an advantage of 64-bit over 32-bit architecture?

- A. 64-bit computers can address more memory than 32-bit.
- B. 32-bit computers are limited to two network interfaces; 64-bit support up to eight.
- C. 64-bit computers support virtualization; 32-bit do not.
- D. 64-bit computers support power management technology; 32-bit do not.

**Answer:** A

**QUESTION:** 110

Which statement is true about tuning and optimizing the processor settings for Hyper-V in Windows Server 2008 R2?

- A. You cannot allocate more than 90% of available CPU to any single virtual machine.
- B. Hyper-V logical processors cannot support a guest OS version older than Windows Server 2003.
- C. The number of logical processors for a virtual machine is limited to the number of physical processors on the host.
- D. 32-bit guest virtual machines require a 32-bit Hyper-V host.

**Answer:** C

**QUESTION:** 111

You have a Red Hat EL server running as a virtual machine on a VMware ESX host. You are about to apply a kernel update to the server. You would like to quickly and easily uninstall the update if something goes wrong. Which VMware feature will allow you to easily uninstall the update?

- A. Virtual Disk
- B. VMware Tools
- C. Snapshot
- D. System Restore

**Answer:** C

**QUESTION:** 112

You have just installed a Red Hat EL server. As part of your standard configuration, you need to configure this server to send all kernel and authentication log events to a central syslog server. Which configuration file must you edit to accomplish this?

- A. /var/log/system.conf
- B. /etc/syslog.conf.
- C. /boot/grub/system.conf
- D. /etc/sysconfig/log.conf

**Answer:** B
